I Still Believe In Rock n Roll

I live my life for rock n roll
The only thing that ever soothed my soul
They say it's passion, that's what I've been told
So I packed up my bags and went out on the road

I left my home just to get away
I found a new place where I could play
The best of times with friends all around
I've just got to get back there cause I love that town

I believe in rock n roll
The only thing that ever soothed my soul
And if you want me I'll be down at the show
I still believe in rock n roll

Never had no babies, never had no wife
Some people say, "Boy, you've been livin the life"
And the women I've known
I love them just the same
Though I can't remember some faces
And I forget some names

I believe in rock n roll
The only thing that ever soothed my soul

And if you want me I'll be down at the show
I still believe in rock n roll
I still believe in rock n roll

Anyway the point is I've lived and I've learned
How to fly high, how to crash and burn
And through it all the world still turns
Got my rock n roll stripes
Cause that's what I've earned

Never had no babies, never had no wife
Some people say "Boy, you missed out on life"
Well that may be so but look at this smile on my face
For all you rock n roll babies right here in this place

I believe in rock n roll
The only thing that ever soothed my soul
And if you want me I'll be down at the show
I still believe in rock n roll
