

No Personality

No personality

**Well I was up all night I hadn't seen the light
I knew I could be feelin better
If I could just get out of sight
Go hit the road**

**Well I was feelin just fine
Or so I thought in my mind
I'd be feelin better if I didn't have to climb
All the time umm humm**

**The mountain is high The valley is low
You're up on cloud ten so how could you know?**

**I got no personality, no personality,
No personality, no personality
I got no personality so tell me some more**

**No personality, no personality
No personality, no personality
No personality so tell me some more
No personality, no personality
No personality, no personality**

No personality so tell me some more

The things that you say, the things that you do

Remind me of a story

One that leaves a lot of room for the truth

Well thanks for the tip it was sure kind of hip

The words they come cheap now and so was the trip

How was yours? I hope it was fine

It's only words so don't get me wrong

Some give opinions and some write songs

Just like No personality, no personality

No personality, no personality

No personality so tell me some more

No personality so tell me some more

No personality

Won't you tell me some more?
